</table>
2.3.1 Banded Iron Formations (BIFs)
2.3.2 Metabasalt
2.3.3 Schist
2.3.4 Tuffaceous argillite
2.3.5 Shale
2.3.6 Fractured / sheared quartz veins

2.4 Structural geology of Gadag Schist Belt

2.5 Nagavi Structures
2.5.1 Ripple marks
2.5.2 Bedding
2.5.3 Folds
2.5.4 Faults
2.5.5 Sheared zones
2.5.6 Oolitic and vesicular structures

3 Petrography and Mineralogy

3.1 Introduction
3.2 Petrographic studies
3.2.1 Banded magnetite / hematite chert / quartzite
3.2.2 Metabasalt
3.2.3 Carbonated sheared anorthosite

4 Geochemistry

4.1 BIF classification
4.2 Geochemistry of gold deposits
4.3 Sampling, instrument and methodology
4.4 Geochemistry of Gadag schist belt
4.5 Banded Iron Formation (BIF)
4.5.1 Major elements analysis of BIFs
4.5.2 Trace elements analysis of BIFs
4.5.3 Major elements comparison with world standard BIF and study area
4.6 Sulphur in BIF
4.7 Metabasalts
4.7.1 Metabasalts of Nagavi area
4.7.2 Major elements of Metabasalts
4.7.3 Trace elements of Metabasalts

5  **Mineralisation**  101-121
   5.1 Gold mineralisation in Dharwar Craton
   5.2 Gold mineralisation in Gadag Schist Belt
   5.3 Gold mineralisation in Nagavi
   5.4 Ore Microscopic Study
   5.5 Wall rock alterations and sulphidation
   5.6 Ancient workings in auriferous shear zones at Nagavi area
   5.7 Structural Controls
   5.8 Stages of fluid channelization and mineralisation
   5.9 Gold mineralisation model
   5.10 Genesis of BIF hosted gold mineralisation

6  **Fluid Inclusion Study**  122-151
   6.1 Introduction
   6.2 Quartz vein intrusions in the Nagavi study area
      6.2.1 BIF with quartz veins
      6.2.2 Metabasalt with quartz veins
   6.3 Field techniques and sampling
   6.4 Instrument and Methodology
   6.5 Fluid Inclusion Petrography
   6.6 Micro thermometry
      6.6.1 Carbonic inclusion
      6.6.2 Aqueous and aqueous carbonic inclusions
   6.7 Fluids

7  **GIS and Remote sensing applications**  152-178
   7.1 Introduction
      7.1.1 Energy Source or Illumination (A)
      7.1.2 Radiation and the Atmosphere (B)
      7.1.3 Interaction with the Target (C)
      7.1.4 Recording of Energy by the Sensor (D)
7.1.5 Transmission, Reception, and Processing (E)
7.1.6 Interpretation and Analysis (F)
7.1.7 Application (G)

7.2 Optical Remote Sensing Systems
7.2.1 Panchromatic imaging system
7.2.2 Multispectral imaging system
7.2.3 Super-spectral imaging systems
7.2.4 Hyperspectral imaging systems

7.2.5 Solar Irradiation
7.2.6 Spectral Reflectance Signature
7.2.7 Colour Composite Images
7.2.8 True Colour Composite (TCC)
7.2.9 False Colour Composite (FCC)
7.2.10 Natural Colour Composite (NCC)

7.3 ASTER Image Applications
7.4 Landsat Image applications
7.5 Minimum Noise Fraction (MNF)
7.6 Satellite Imagery Applications

7.7 Orbits and Swaths
7.8 Resolution
7.8.1 Spatial Resolution
7.8.2 Spectral Resolution
7.8.3 Temporal Resolution

7.9 Digital Image Processing
7.9.1 Image enhancement techniques
7.9.2 Mineral exploration
7.9.3 Band ratio images
7.9.4 Principal Component Analysis (PCA)
7.9.5 GIS Geospatial Analysis
7.9.6 Typical image processing routines include
7.10 Global positioning system
7.11 Datum and GIS
7.12 Geographic Information System (GIS) applications
7.13 LISS III image processing with auriferous shear zones
7.14 Lineament
7.15 Landuse / Land cover
7.16 Contour and Slope map
7.17 Image Processing of Landsat ETM data
