Preface vii

Acknowledgements x

List of Symbols xii

1 Introduction 1

1.1 Brief History .............................................. 1
1.2 Basic Notions of Lattices ................................. 5

I Dimension Theory and Extending Ideals 12

2 Essential Extensions of Ideals in Lattices 13

2.1 Introduction .............................................. 13
2.2 Essential Ideals .......................................... 14
2.3 Max-semicomplements ..................................... 20
2.4 Closed Ideals ............................................. 27

3 Finite Dimension in Lattices 32

3.1 Introduction .............................................. 32
3.2 Uniform Ideals ........................................... 33
3.3 Lattices with Finite Dimension ......................... 36

4 Objective Ideals in Lattices 48

4.1 Introduction .............................................. 48
4.2 Injective Ideals .......................................... 49
4.3 Extending Ideals ......................................... 54
4.4 Exchangeable Decomposition .............................. 59
4.5 Objective Ideals ......................................... 62
