Chapter 1: Introduction

1.1 Introductions of Herbal medicines.
1.2 Ayurveda
1.3 Global scenario of Herbal medicine
1.4 Herbal medicine scenario in India
1.5 Survey of Plant-derived Drugs
   1.5.1 Infectious Diseases Area
   1.5.2 Neurological Diseases Area
   1.5.3 Cardiovascular and Metabolic Diseases Area
   1.5.4 Immunological, Inflammatory, and Related Diseases Area
   1.5.5 Oncological Diseases Area
1.6 Agrochemical of Plant Origin
   1.6.1 General overview
   1.6.2 Few Examples of Plant-Derived Insecticides
1.7 Medicines for dermatological disorder.
   1.7.1 Drug Therapy of Fungal Skin Infections
      1.7.1.1 Topically useful antifungal agents are
1.8 Herbs medicine for dermatological disorder.
   1.8.1 Skin order
      1.8.1.1 Diagram of the layers of human skin
      1.8.1.2 Types of the skin
      1.8.1.3 Functions of the skin
      1.8.1.4 Hygiene
      1.8.1.5 Skin Disorder:
         1.8.1.5.1 Scabies
         1.8.1.5.2 Herpes
         1.8.1.5.3 Acne
         1.8.1.5.4 Dandruff
         1.8.1.5.5 Psoriasis
1.8.1.5.6  Ringworm

1.9  From the literature

1.10  Aim and significance of the work.

Chapter 2:-  Materials & morphological study

2.1 Collection of Plant Materials
2.2 Plant morphology (phytomorphology)
       2.2.1 Cassia tora
          2.2.1.1 Botanical description
          2.2.1.2 Morphological characters
          2.2.1.3 Microscopical characters
       2.2.2 Cassia fistula
          2.2.2.1 Botanical description
          2.2.2.2 Morphological characters
          2.2.2.3 Microscopical characters

Chapter 3:-  Experimental and Characterization techniques

3.1  Experimental
       3.1.1  Preparation of the Laboratory Sample
       3.1.2  Packaging and transmission of the laboratory sample.
       3.1.3  Chemicals
       3.1.4  Glassware cleaning process

3.2  Methodology employed for the extraction and Isolation and pre-concentration.
       3.2.1  Fluorescence characteristic of the samples.
       3.2.2  Methods of extraction
       3.2.3  Thin Layer Chromatography – TLC
       3.2.4  Column Chromatography

3.3  Characterization techniques
       3.3.1  UV/Visible analyses
       3.3.2  FTIR-Analyses
3.3.3 HPLC analyses
3.3.4 NMR Spectroscopy
3.3.5 Mass Spectroscopy

3.4 Biological Screening
3.4.1 Evaluation techniques
3.4.2 Determination of Minimal bacterial Concentrations

Chapter 4:- Results & Discussion

4.1 Results and Discussions:
4.1.1 Percentage yield of extracted materials in different medium
4.1.2 Column Chromatography
4.1.3 Thin Layer Chromatography – TLC

4.2 Results of Characterization techniques:
4.2.1 Fluorescence characteristic of the samples.
4.2.2 Separation techniques for the Anthraquinone derivatives
   4.2.2.1 Reproducibility of Standards by HPLC- UV techniques
   4.2.2.2 Linearity of Standards by HPLC UV techniques
   4.2.2.3 Calibration curve
   4.2.2.4 Recovery data of standard addition by HPLC- UV
detector techniques
4.2.3 Anthraquinone derivatives in plant species
4.2.4 Results of UV/Visible spectra
4.2.5 FTIR spectra of the samples
4.2.6 NMR spectra of anthraquinone derivatives
4.2.7 Mass Spectroscopy

4.3 Antimicrobial activity of the extracts
4.3.1 Anti bacterial activity
4.3.2 Antifungal activity

Chapter 5:- Conclusion & Applications

5.1 Conclusions from the analytical results
5.2 Ointment Preparation
5.3 Clinical trial, An Overview

5.3.1 Assessment Criteria

5.4 Overall results of the treatments
