I hereby express my hearty gratitude to Dr. J.S. Kanwar, M.Sc. (Agri.) (Punjab), Ph.D. (Soils) (Adelaide, Australia), F.I.C., Director of Research and Dean, Punjab Agricultural University, Ludhiana, under whose guidance this piece of research work was undertaken. But for his kind help, keen interest, constructive criticism, timely instructions and encouragement during the whole course of this study, it would not have been possible for me to conduct these investigations.

My sincere thanks are also due to Dr. D.R. Bhambha, Professor of Soils, Punjab Agricultural University, Ludhiana, for his kind inspiration and valuable suggestions during the compilation of this thesis.

My thanks are also due to Shri M.S. Avdani, Assistant Professor of Statistics and Shri J.R. Jindia, Assistant Statistician for their kind help in statistical analysis.

I shall also be failing in my duty if I do not convey my gratefulness to the Indian Council of Agricultural Research, New Delhi for rendering me financial help by awarding Senior Research Fellowship during the tenure of which this research work was undertaken.

(Bishan Singh Kanwar)
