Chapter VII

BIBLIOGRAPHY

Adams, F. (1939) The genuine works of hippocrates Williams and Wilkins, Baltimore.

Gibbs, D.A. and Watts, R.W.E. (1973) The identification of the enzyme that catalyzes the oxidation of glyoxylate to oxalate in the 100,000 g

On the protective role of intra renal glycosaminoglycans in man. 

in human renal tissues; The key to the pathogenesis of stone formation. 

oxalate excretion in man. *Urolithiasis Research* Fleisch, H., Robertson, 
389-393.

Henneman, P.H., Benedict, P.H. and Forbes, A.P. (1958) Idiopathic hypercalciuria 

Henry, R.J. (1967) Determination of uric acid by reaction with alkaline 
phosphotungustate. In; *Clinical chemistry: Principles and techniques* 

determination of the kinetics of calcium binding with chondroitin 
sulphate and the effects of uric acid on this process. *Urol. Res.* 15: 
93-97.

glycosaminoglycans in the urine of calcium-oxalate stone patients and 

glycosaminoglycans for the formation of oxalate stones. *Am. J. Kid. 
Dis.* XVII: 414-419.

Hesse, B., Nakagawa, Y. and Coe, F.L. (1989) Inhibition of calcium oxalate 

$\text{Na}^+\text{-P}$: Cotransport by $1,25\{(\text{OH})_2\}\text{D}_3$ in rabbit duodenal brush-border 

Nisselbaum, J.S., Packer, D.E., Bodansky, O. (1964) Comparison of the actions of human brain, liver and heart lactic dehydrogenase variants on
nucleotide analogues and on substrate analogues in the absence and in the presence of oxalate and oxamate. J. Biol. Chem. 239: 2830-2834.

Multidimensional approach to urolithiasis Proceedings of the Third National Conference Urolithiasis Society of India, Udaipur, India.
