ACKNOWLEDGEMENT

My heartfelt gratitude to my supervisors, Professor R. K. Kohli, B.P. Pal National Environment Fellow and Coordinator Environment Studies, Panjab University, Chandigarh and Professor A.M. Kalra, In-charge Postgraduate Irrigation and Hydraulics Department, Punjab Engineering College, Chandigarh for their able guidance, untiring help, encouragement and constructive criticism during the course of research work.

Dr. Baljit Kapoor, Principal, Punjab Engineering College, Chandigarh and my worthy teacher ignited my interest towards higher learning through research and shaping my engineering interests as one of my respected teachers during my graduate and postgraduate studies.

I am indebted to Sh. R.S. Gujral, IAS, Home Secretary and Secretary Technical education, U.T. Chandigarh for his interest in study that served as a source of encouragement for me.

The foresightedness of Principal Secretary (Forests) U.P. and Principal Chief Conservator of Forest (U.P) in assigning me the responsibility of studying the models for soil and water conservation is deeply admired so that the experience of the study could be translated in Uttar Pradesh, the state I am deputed to serve.

Thanks are due to the residents of Sukhomajri village, Bhagwasi village and Sukhna lake catchment area for providing necessary help in taking measurements of the structures, collection of the past data of the sites and filling the questionnaire for the Socio-Economic survey.

The management of FRI, Dehradun, IARI, New Delhi, PAU Ludhiana, NBRI, Lucknow, PEC Chandigarh, CSWCRITI and RC, Chandigarh, Department of forests - Panjab, Haryana, H.P. and Chandigarh, Meteorological department, Government of India, Chandigarh, State Centre of Institution of Engineers (India), also deserves my thanks for permitting me to consult their libraries from time to time and for providing valuable information, literature, journals etc., some of which have been referred to in this thesis work.

Thanks are also due to and Shri Sham Lal Goyal, IAS, Director of Census, UT, Chandigarh, Dr. S.S. Grewal, Executive Director, WB Kandi project and Shri SC Bhan, Incharge, Meteorological Centre, Chandigarh for their timely help and guidance and fruitful discussions.

Above all and much more than the usual debt of gratitude must be expressed to my worthy respected parents and elder brother, Mr. Vijay Sehgal, IRSE, and my caring & affectionate wife, Dr. Sarika and my little son who encouraged me throughout my academic pursuit. I take this opportunity to bow affectionately to them - without whom I could not have reached, where I am.

Place: Chandigarh
Date: 4/8/7 ov.5

(Ajay Sehgal)
