ACKNOWLEDGEMENTS

First of all, I would like to express my profound sense of gratitude to my supervisor Dr. V. Cyril Raj, for trusting me and supporting me all these years, providing me with valuable advice and introducing me to this research topic and providing his valuable guidance and unfailing encouragement throughout the course of work. Without his guidance and persistent help this dissertation would not have been possible.

I am immensely grateful to my joint supervisor Dr. K. Thirunadana Sikamani and doctoral committee members Dr. R. M. Suresh and Dr. T. Ravi for their constant advice and support for the successful completion of this work. I owe a deep debt to the Vice Chancellor, Prof. Dr. D. S. Ramachandra Murthy who gave me the opportunity to register as a research scholar. I am very much thankful to the D. Prem Kumar of Ph.D. Section for providing me adequate help whenever required. Finally, I would like to express that I am indebted to my family for their constant and continuous support throughout my educational career.

(KALLA. MADHU SUDHANA)
