ACKNOWLEDGEMENTS

Coming together is a beginning, keeping together is progress and working together is success. Although my name is on its spine, I have not travelled in a vacuum in the journey to complete this doctoral thesis. It has been kept on track and has been seen through with the unstinting support and encouragement of my family, mentors, well-wishers and friends. It is a pleasure to express my gratitude to all those who contributed in many ways to the success of this academic project and made it an unforgettable experience for me.

Foremost, I owe it all to Almighty God for granting me the wisdom, health and strength to undertake this research work and enable me to work towards its completion.

I express my deep sense of gratitude and veneration towards my Supervisor, Prof. R. K. Bansal, Professor, Department of Chemistry, The IIS University, Jaipur, for his unwavering support and insightful guidance throughout my work. His academic excellence and a deep sense of commitment to the cause of research, combined with affectionate encouragement, positive approach, invaluable suggestions and constructive criticism throughout, all of which have been a source of inspiration and will continue to enlighten my path in future as well. I find myself extremely fortunate to have him as my supervisor as he has guided me not only in terms of my area of research, but has also cultivated and nurtured research acumen in me.

Words are inadequate to express my sincere thanks to my Co-Supervisor, Dr. Raakhi Gupta, Professor, Department of Chemistry, The IIS University, Jaipur, for her constant and patient guidance, which has greatly helped me in the writing of this thesis. A person with an amicable and positive disposition, she always made herself
available to clarify my doubts despite her busy schedule. I am really indebted to her for the long discussions that helped me sort out the technical details of my work. I am also thankful to her for carefully reading and commenting on countless revisions of this manuscript. Her intellectual visibility and affection gave me enough confidence to sail through this difficult venture.

I also sincerely thank Dr. Ashok Gupta, Vice-chancellor, The IIS University, Jaipur, for providing the necessary facilities and support to carry out my research work.

May I take this opportunity to sincerely acknowledge the help and guidance of Prof. Moritz von Hopffgarten, University of Marbug, Germany, and Prof. Sourav Pal, NCL, Pune towards the completion of some computational calculations. My thanks are also due to Mr. Susanta Das, NCL, Pune, for helping me in calculations.

I express profound gratitude to the academic staff, Dr. Varsha Goyal, Dr. Pragya Sinha, Dr. Manisha Patni, Dr. Ruchi Singh, Dr. Deepak Rajawat, Dr. Tripti Gupta and Dr. Pratibha Mittal of the department of chemistry for their invaluable inputs from time to time, in carrying out my research work. I am also thankful to the technical staff, Mr. Jagdish Singh Rajawat, Mr. Vinod Vyas, Mr. Jitendra Goyal and Mr. Gopal Tal for providing all possible help during my research work. I would also like to thank my lab colleagues, Ms. Asha Gurjar, Ms. Nidhi Sogani, Ms. Sudesh, Ms. Deepika Singh, Ms. Rati Agarwal and Ms. Manjinder Kour for providing me friendly co-operation and ensuring a harmonious atmosphere.

Many friends have helped me stay sane through these difficult years. I acknowledge the loving support and care of Ms. Preeti Jain, Ms. Karuna Maheshwari, Mr. Rohit and Ms. Devshree Jain who helped me overcome setbacks and stay focused on my research work. I greatly value their friendship.
The financial assistance from the University Grant Commission, New Delhi, too is gratefully acknowledged.

I extend my heartiest gratitude to my family for inspiring me at all stages of this work. None of this would have been possible without the love, concern, support and patience of my parents Mrs. Sumitra Sarda and Mr. Radha Mohan Sarda. I take this opportunity to further extend my deepest gratitude to my elder brothers, Dr. Sachin Sharda and Mr. Ankur Maheshwari and sister-in-law Dr. Pallavi Maheshwari, for all the moral support. Their constant encouragement egged me on to work hard. My sweet little niece, Saavi always supported me emotionally, even when I was stressed and irritable during this period. Her smile, sweet talks and playfulness has always enlivened my spirit.

Finally, I wish to express my deep appreciation and heartfelt gratitude to all the respondents who so readily consented to spare time and offer their insightful comments on the subject of my research work. My thanks go to all those as well, who have helped me and contributed towards successful completion of this work, even in the smallest of ways, and whose names could not be mentioned here.

Pooja Maheshwari
