Acknowledgements

I acknowledge all possible help provided by my supervisor Dr. R. S. Chakravarti, Reader and Head, Department of Mathematics, Cochin University of Science and Technology. I am grateful to him for initiating me into this area of research and for his sincere guidance and non terminating inspiration. I found him not only a good teacher but also a good man as well as a good friend and all this definitely made my life easier in this city of Cochin. Without this the research could not have been accomplished.

I express my sincere thanks to all the teachers, non-teaching staff, the librarian and research scholars of this department for their kind co-operation.

I kindly acknowledge the financial assistance given by University Grants Commission (UGC), New Delhi throughout my research as JRF for the initial two years and SRF for the later years.

I owe very much to my parents, brothers, sisters and especially to my wife and daughter for the moral support they extended for the last five years.

I thank everyone who helped me in preparing this thesis.

I hereby thank the three examiners for studying and assessing this thesis. I have been shown two examiners’ reports and I thank these examiners for pointing out omissions and obscurities. Their comments have greatly improved the thesis.
Above all I acknowledge the grace and kindness of my God Lord Shri Ram Ji due to which, I personally feel that I overcame all the difficulties and the realization of the thesis became possible.

Santosh Kumar Pandey
