<tbody>
<tr>
<td>3.1</td>
<td>General features in the study area using a five-point scale</td>
</tr>
<tr>
<td>4.1</td>
<td>Physico-chemical properties of water in rivers Pare, Pachin and Dikrong (n=48)</td>
</tr>
<tr>
<td>4.2</td>
<td>Physico-chemical properties of water in river Dikrong at Doimukh, Nirjuli and Karsinghsa (n=72)</td>
</tr>
<tr>
<td>4.3</td>
<td>Correlation matrix for physico-chemical properties of water of the river system of Dikrong (n=96)</td>
</tr>
<tr>
<td>4.4</td>
<td>One- and two-way ANOVA for the effect of site and year on different parameters in all six stations in rivers Pare, Pachin and Dikrong</td>
</tr>
<tr>
<td>4.5</td>
<td>One- and two-way ANOVA for the effect of station and year on different water parameters across three stations of river Dikrong</td>
</tr>
<tr>
<td>4.6</td>
<td>Surface water quality standard (as per IS: 2296) for drinking water source with conventional treatment followed by disinfection</td>
</tr>
<tr>
<td>5.1</td>
<td>Physical properties of soil/sediments along rivers Pare at Sagalee and Kheel, Pachin at Barapani and Dikrong at Doimukh, Nirjuli and Karsinghsa (n=24)</td>
</tr>
<tr>
<td>5.2</td>
<td>Chemical properties of soil/sediments along rivers Pare at Sagalee and Kheel, Pachin at Barapani and Dikrong at Doimukh, Nirjuli and Karsinghsa (n=24)</td>
</tr>
<tr>
<td>5.3</td>
<td>Correlation matrix for physico-chemical properties of the soil and sediment of the river system of Dikrong (n=432)</td>
</tr>
<tr>
<td>5.4</td>
<td>One-way and two-way ANOVA for all physico-chemical properties of soil/sediments in Pare at Sagalee and Kheel, Pachin at Barapani and Dikrong at Doimukh, Nirjuli and Karsinghsa</td>
</tr>
<tr>
<td>5.5</td>
<td>Variations in bacterial and fungal populations in soils of river bank and sediments of river bed and river line in rivers Pare at Sagalee and Kheel, Pachin at Barapani and Dikrong at Doimukh, Nirjuli and Karsinghsa (n=12)</td>
</tr>
<tr>
<td>5.6</td>
<td>Variations in microbial biomass carbon (MBC), microbial biomass nitrogen (MBN), microbial biomass phosphorous (MBP), contributions of MBC to organic carbon (OC) and MBN to total nitrogen (TN) in soils of river bank and sediments of river bed and river line in rivers Pare at Sagalee and Kheel, Pachin at Barapani and Dikrong at Doimukh, Nirjuli and Karsinghsa (n=12)</td>
</tr>
<tr>
<td>5.7</td>
<td>Correlation coefficients (r) for the soil and sediment physico-chemical properties with the microbiological properties in Pare at Sagalee and Kheel, Pachin at Barapani and Dikrong at Doimukh, Nirjuli and Karsinghsa (n=216)</td>
</tr>
<tr>
<td>5.8</td>
<td>Correlation coefficients (r) for the microbial population and microbial biomass C, N and P of soil in river bank and sediment in river bed and river line of Pare at Sagalee and Kheel, Pachin at Barapani and Dikrong at Doimukh, Nirjuli and Karsinghsa (n=216)</td>
</tr>
<tr>
<td>5.9</td>
<td>One-way ANOVA for microbial properties of soil in river bank and sediment in river bed and river line of Pare at Sagalee and Kheel, Pachin at Barapani and Dikrong at Doimukh, Nirjuli and Karsinghsa</td>
</tr>
<tr>
<td>5.10</td>
<td>Distribution of phytoplankton along the rivers Pare, Pachin and Dikrong</td>
</tr>
<tr>
<td>5.11</td>
<td>Correlation coefficients (r) for the phytoplankton density with physico-chemical properties of the water of Dikrong river system (n=24)</td>
</tr>
<tr>
<td>5.12</td>
<td>Distribution of periphyton along rivers Pare, Pachin and Dikrong</td>
</tr>
<tr>
<td>5.13</td>
<td>Correlation coefficients (r) for the periphyton density with physico-chemical properties of the water of Dikrong river system (n=18)</td>
</tr>

</table>

Continued----
7.11 Gross primary production (GPP), net primary production (NPP) and community respiration (CR) in river Dikrong at Doimukh, Nirjuli and Karsinghsa (n=36)
7.12 Relationship between gross primary productivity, net primary productivity and community respiration with physico-chemical properties of river water (n=48)
7.13 Correlation coefficient (r) for the gross primary productivity, net primary productivity and community respiration with different phytoplankton density in the river system of Dikrong (n=24)
7.14 Correlation coefficients (r) for the chlorophyll a concentration in periphyton and some physico-chemical properties of the water of Dikrong river system (n=18)
8.1 Distribution of benthic macro-invertebrates along the rivers Pare, Pachin and Dikrong
8.2 Correlation coefficients (r) for the benthic macroinvertebrate density and physico-chemical properties of the water of Dikrong river system (n=23)
8.3 Correlation coefficients (r) for the benthic macroinvertebrate density and physico-chemical properties of the sediment of Dikrong river system (n=23)
8.4 Diversity and community indices of the benthic macroinvertebrates in rivers Pare, Pachin and Dikrong
8.5 Sorenson’s index for similarity in benthic macroinvertebrates in the six stations of rivers Pare, Pachin and Dikrong
8.6 Relationships between species diversity and pollution status according to Staub et al. (1970)
8.7 Relationships between species diversity and pollution status according to Wilhm and Dorris (1966)
9.1 Riparian vegetation along rivers Pare, Pachin and Dikrong
9.2 Riparian vegetation along rivers Pare, Pachin and Dikrong during pre-monsoon season
9.3 Riparian vegetation along rivers Pare, Pachin and Dikrong during monsoon season
9.4 Riparian vegetation along rivers Pare, Pachin and Dikrong during post-monsoon season
9.5 Riparian vegetation along rivers Pare, Pachin and Dikrong during winter season
9.6 Herbaceous vegetation along the river bank of Pare, Pachin and Dikrong
9.7 Sorenson’s index of similarity for the riparian vegetation in the six stations of rivers Pare at Sagalee and Kheel, Pachin at Barapani and Dikrong at Doimukh, Nirjuli and Karsinghsa
9.8 Seasonal variations in species richness and diversity of riparian vegetation in Dikrong river system
9.9 Species richness and diversity of riparian vegetation in Dikrong river systems (n=4)
10.1 Biomass of riparian vegetation in Dikrong (kg ha\(^{-1}\)) (n=40)
10.2 Productivity of riparian vegetation in Dikrong (kg ha\(^{-1}\) year\(^{-1}\)) (n=40)
10.3 Biomass of riparian vegetation in Pare, Pachin and Dikrong (kg ha\(^{-1}\)) (n=40)
10.4 Productivity of riparian vegetation in Pare, Pachin and Dikrong (kg ha\(^{-1}\) yr\(^{-1}\)) (n=40)
10.5 Nutrient concentration (%) of riparian vegetation in Dikrong river basin (n=12)
10.6 C: N and N: P ratios of riparian vegetation in Dikrong river basin
