ACKNOWLEDGEMENTS

The research presented in this licentiate thesis has been carried out at the Department of Geology, Sri Venkateswara University, Tirupati. The author acknowledges his debt to those who have helped along the way and influenced the formation of the understanding of and the approach to representation of different applications presented in this thesis.

In particular, I wish to express my gratitude to my supervisor, Prof. Y. Venkatarami Reddy for his continued encouragement and valuable suggestions during this work.

In this I would also like to include my gratitude to Prof. T. V. Krishna Reddy at department who has provided support for this research.

Furthermore I am deeply indebted to the Prof. R. C. Hanumanthu, Prof. K. Kesava Raju and Research Scholars at department that have provided the environment for sharing their experiences about the problem issues involved as well as participated in stimulating team exercises developing solutions to the identified problems.

Many others at department including teaching and non-teaching staff that have been involved also deserve recognition.

I would specially like to thank Dr. K. M. Reddy, Director and Dr. V. Raghu, Senior Scientific Officer from APSRAC, Hyderabad for their extreme valuable experience, support and insight.
This is also extended to Dr. M. Rama Krishna Reddy, Professor, Yogi Vemana University with whom I explored the concept of design bandwidth.

Furthermore I would like to recognize many valuable contributions from my friends Ch. Ravikantha Reddy, K. Lakshmikanta Reddy, P. Venkata Rami Reddy and G. Sanjeeva Reddy.

It is, however, not possible to list them all here. Their support in this effort is, however, greatly appreciated.

Finally I want to thank my family. The encouragement and support from my beloved wife Deepa Machireddy and our always positive and joyful child Keerthana Machireddy is a powerful source of inspiration and energy. A special thought is devoted to my parents for a never-ending support.

Sunandana Reddy Machireddy
