ACKNOWLEDGEMENT

The writing of this dissertation has been an incredible journey and a monumental milestone in my academic life. I could not have embarked on this expedition and travelled this far without the passionate and continued support of advisors, colleagues, friends and family.

First of all, I would like to express my first words of gratitude to my supervisor and dissertation advisor Prof. Manabendra Dutta Choudhury, Professor and Head, Department of Life Science & Bioinformatics, Assam University, Silchar for providing me an opportunity to register for Ph. D. I am thankful to him for giving me the freedom to pursue my interest and explore ideas and to have the open mindedness and confidence in me to see it out. He has been the most perceptive and patient mentor – the numerous conversations and electronic exchanges we had constantly improved and refined this work. He is also an understanding and encouraging friend who has stood by me in times of difficulties.

I feel highly privileged to express my heartfelt sincere gratitude to my esteemed co-supervisor, Professor Satya Bhusan Paul, Professor, Department of Chemistry, Assam University, Silchar for his encouragement, moral support and valuable guidance that inspired me to do my best. I appreciate all his contributions of time, ideas, and guidance to make my Ph.D. experience productive and stimulating.

I convey my gratitude to Honourable Vice Chancellor, Assam University, Silchar, who supported my endeavour whole heartedly.

It is my great privilege to acknowledge Dean of School of Life Sciences and Bioinformatics for allowing me to do this work.

I owe my deepest gratitude to Dr. Anupam Das Talukdar for encouraging me through the dissertation process. It is my great privilege to acknowledge all the teachers of Department of Life Sciences and Bioinformatics for their valuable advice and guidance.
I cannot find words to express my gratitude to Dr. Sudip Choudhury, Assistant Professor, Department of Chemistry, Assam University, Silchar for his critical suggestions while doing the experiments and also while writing the thesis. He has generously extended his counsel and warm friendship in my doctoral endeavour.

It gives me immense pleasure to acknowledge to my teachers Mr. Mukul Baruah, Mrs Gopa Chakrabarty, Mrs Purnima Dutta Choudhury, Lecturers in Dept. of Botany, Cachar College, Silchar and Mr. Deepak Kumar Nair, HOD, Dept. of Botany, Cachar College, Silchar for their encouragement, moral support and valuable guidance which inspired me to do my best. I can never forget their constant encouragement and persuasiveness during the course of my work.

I am grateful to University Grants Commission (UGC), New Delhi for providing me financial support in the form of UGC-Non NET fellowship grant.

I sincerely acknowledge the literature support received from Bioinformatics Centre, Assam University, Silchar, India. Thanks to Dr. Pankaj Chetia and Manjur Ahmed Laskar for constantly supporting me during the course of work.

I also wish to thank my lab colleagues Saswati Roy, Rumki Nath, Kh. Bharati Singh, Sudipta Das, and others for providing constructive suggestions throughout the work. I am also thankful to all other lab mates specially Rajesh Paul, Rasila Devi, Monidipa Roy, Chinmoy Choudhury and staff members for their support at different times.

I wish to acknowledge all the staffs of Sophisticated Analytical Instrumentation Facility (SAIF), North Eastern Hill University, Shillong for providing me TEM photographs and Mass spectral data.

I would like to thank faculty members and staff of CIL, Assam University Silchar for providing me HPLC chromatogram and all necessary help.

My sincere thanks to all the staff of Dept. of Pathology, Silchar Medical College for supplying me pure cultures of some pathogenic microbial strains.
Last but not the least I am deeply indebted to my parents, Late Nirmal Kanti Dutta Choudhury and Shipra Dutta Choudhury who have certainly blessed my life with an environment in which I could freely pursue my dreams and have the courage to surmount higher mountains. My mother’s painstaking efforts and hard work, care, love, and contribution helped me a lot for shaping and moulding my scientific career. My regards and heartiest gratitude to my friends Rajib Das Gupta and Gayatri Ghosh who as a family member always stood by me during times of difficulties. Their moral support, kind help, encouragement and fruitful nature led me to share all the things with them. I am also thankful to my sisters, Madhumita Ghosh and Sebapreeta Das for their constant encouragement for doing the good work.
