5.20 System of medicine used frequently
5.21 Distance from SMCH
5.22 Type of medical treatment given
5.23 Reasons for discontinuation of the treatment
5.24 Content of knowledge of the patients about HIV/AIDS
5.25 Patient’s knowledge about family planning
5.26 Whether the patient support family planning or not
5.27 Patient’s knowledge about vaccination
5.28 Whether the patient believe that unsafe drinking water can cause some disease or not
5.29 Reason behind a child being male or female according to the patient
5.30 Materials used for washing hands
5.31 Whether the patient wash hands before taking food or not
5.32 Regular exposure of bed to sunlight
5.33 Use of insecticides to sanitize the house from mosquitoes and flies
5.34 Daily cleanliness of the environs
5.35 Causes for which the patient can not discuss about the disease openly
5.36 Reason for preferring female doctors
5.37(1) Cross tabulation of educational qualification of the patient with age at first coitus
5.37(2) Chi-Square tests of educational qualification of the patient and age at first coitus
5.38(1) Cross tabulation of educational qualification of the patient with patient's consent at first coitus
5.38(2) Chi-Square tests of educational qualification of the patient and patient's consent at first coitus
5.39(1) Cross tabulation of educational qualification of the patient with the number of children
5.39(2) Chi-Square tests of educational qualification of the patient and the number of children 209

5.40(1) Cross tabulation of educational qualification of the patient with patient's knowledge about HIV/AIDS 209

5.40(2) Chi-Square tests of educational qualification of the patient and patient's knowledge about HIV/AIDS 210

5.41(1) Cross tabulation of educational qualification of the patient with patient's support to family planning 210

5.41(2) Chi-Square tests of educational qualification of the patient and patient's knowledge about HIV/AIDS 211

5.42(1) Cross tabulation of educational qualification of the patient with the habit of washing hands daily before taking food 211

5.42(2) Chi-Square tests of educational qualification of the patient and the habit of washing hands daily before taking food 212

5.43(1) Cross tabulation of educational qualification of the patient with the use of insecticides by the patient 212

5.43(2) Chi-Square tests of educational qualification of the patient and the use of insecticides by the patient 213

5.44(1) Cross tabulation of educational qualification of the patient with the daily cleaning of toilets 213

5.44(2) Chi-Square tests of educational qualification of the patient and the daily cleaning of toilets 214

5.45(1) Cross tabulation of educational qualification of the patient with the maintenance of hygiene 214

5.45(2) Chi-Square tests of educational qualification of the patient and the maintenance of hygiene 215

5.46(1) Cross tabulation of educational qualification of the patient with patient's knowledge about the water borne diseases 215

5.46(2) Chi-Square tests of educational qualification of the patient and patient's knowledge about the water borne diseases 216

5.47(1) Cross tabulation of educational qualification of the patient
with frequency of changing pads/cloths per day

5.47(2)  Chi-Square tests of educational qualification of the patient and frequency of changing pads/cloths per day 216

5.48(1)  Cross tabulation of educational qualification of the patient with continuation of the treatment 217

5.48(2)  Chi-Square tests of educational qualification of the patient and continuation of the treatment 217

5.49(1)  Cross tabulation of educational qualification of the patient with family income of the patient per month (approximately) 218

5.49(2)  Chi-Square tests of educational qualification of the patient and family income of the patient per month 219

5.50(1)  Cross tabulation of the family income of the patient with patient’s knowledge about HIV/AIDS 219

5.50(2)  Chi-Square tests of the family income of the patient and patient’s knowledge about HIV/AIDS 220

5.51(1)  Cross tabulation of the family income of the patient with patient’s support to family planning 220

5.51(2)  Chi-Square tests of the family income of the patient with patient’s support to family planning 221

5.52(1)  Cross tabulation of the family income of the patient with the use of insecticide 221

5.52(2)  Chi-Square tests of the family income of the patient and the use of insecticide 222

5.53(1)  Cross tabulation of the family income of the patient with the maintenance of hygiene 222

5.53(2)  Chi-Square tests of the family income of the patient and the maintenance of hygiene 223

5.54(1)  Cross tabulation of family income of the patient with patient’s knowledge about the water borne diseases 223

5.54(2)  Chi-Square tests of family income of the patient and patient’s knowledge about the water borne diseases 224
