This presented work in this thesis would never have been possible without help and support from lots of people. In particular I would like to express my sincere gratitude to:

Prof. Vasanthi Nachiappan, my boss, who gave me the opportunity to perform my Ph.D study in “Biomembrane Lab” and introduced me to the world of “Lipid Biochemistry”. When I entered into her lab, I did not know ABCD about research, now what I have all is because of her only. Without her never-failing support and contagious enthusiasm for hard work, this study would have never been possible. I sincerely thank for her excellent guidance, encouragement during my entire stay over here. She praised me and supported to fight for my rights, stood behind me when facing critical situations and added value to my social life also. I am proud to say that “I am one of your doctoral students” and thank you very much mam..!

Prof. Ram Rajasekharan, Indian Institute of Science, Bangalore for providing me the opportunity to learn basic lipid techniques and permitting me to carry out part of my research work in “Lipid isle”. When I first saw him at Bharathidasan Univ., during his invited special lecture before my Ph.D registration, I greatly admired him and was inspired with his attractive lecture. During my stay at “Lipid isle” I had an opportunity to watch his passion towards science. From the beginning itself he encouraged me that made me a quality researcher. Of course my stay in “Lipid isle” influenced me and changed me a lot. Thanking you very much sir, for given me the wonderful opportunity and support..!
