ACKNOWLEDGEMENTS

Words are inadequate to express my gratitude and indebtedness to Dr. G. Suresh Singh, my supervising teacher and guide, for his invaluable guidance provided during the entire period of my research. I do affirm, without hesitation that, this thesis would never have taken its present shape without his personal touch. His timely suggestions and constant inspiration are the main factors behind the materialization of the thesis.

I express my sincere thanks to Dr. M. I. Jinnah, Professor, Dept. of Mathematics, University of Kerala, who encouraged and nourished my thoughts to carry-out my work and guided me in many ways.

My indebtedness is also due to Dr. A. R. Rajan, Head of the Department of Mathematics, the members of the faculty and to the members of the non-teaching staff and in particular to the Librarian.

My thanks are also due to the U.G.C. and the University of Kerala for selecting me to carry out research under the F.I.P. and the Government of Kerala, for granting deputation for the same.
I owe much to the Management of N.S.S. Colleges for granting leave during the period of deputation. I remember with gratitude the Principal, Mahatma Gandhi College, Thiruvananthapuram for his kind services.

The research fellows in the department were always a source of help to me in many ways.

I make this opportunity to place on record my sincere gratitude to my parents, wife M.S.Latha, daughter Krishna Priya, K.L and son Vishnu, K.L for their unfailing encouragement and support during the course of this work.

K. Karunakaran
