ACKNOWLEDGMENT

I be obliged my immense gratitude to almighty god who proposed me to achieve. Though only my name appears on the cover of this dissertation, a great many people have contributed. They have made this dissertation fruitful and because of whom my experience has been one that I will cherish forever.

First and foremost I would like to convey my immense gratefulness to the Honorable Vice Chancellor, the Director, Head of the Department of Biotechnology and all the faculties of Research and Development Centre of Bharathiar University, Coimbatore, TamilNadu.

My deepest gratitude is to my Research Supervisor, Dr. V. Sukumaran, Assistant Professor (SS), Department of Biotechnology, Periyar Manniammai University, Thanjavur, TamilNadu. I have been amazingly fortunate to have an advisor who gave me the freedom to explore on my own, and at the same time the guidance to recover when my steps faltered. He taught me how to question thoughts and express ideas. His patience and support helped me to overcome many critical situations and finish this dissertation. His insightful comments and constructive criticisms at different stages of my research were thought-provoking and I am indebted to him for his continuous encouragement and guidance. His guidance helped me in all the time of research and writing of this thesis. I could not have imagined having a better advisor and mentor for my PhD study.

I am grateful to Dr. A. Afrose, Principal, Dhanalakshmi Srinivasan College for Women, Perambalur, who grant me consent on FIP provision to comprehensive my research magnificently. I convey my heartfelt thanks to my colleagues Dr. P. Nithya, K. Babyjooju, D. Sahayasukeetha for their encouragement and practical advice. I am also thankful to them for reading my reports; commenting on my views and helping me understand and enrich my ideas.
I feel great happiness in expressing my thanks to the Management, Administrative staffs and TBI technical staffs of PeriyarManniammai University, Thanjavur, whoprovidedme the opportunity to do my research and for their contributions to the various domains. I would like to acknowledge Dr.K.Kumaravel, Indian Institute of Crop Processing and Technology (IICPT), Thanjavur for his support for the analytical support.

Most importantly, none of this would have been possible without the love and patience of my family. My family to whom this dissertation is dedicated to, has been a constant source of love, concern, support and strength all these years. I would like to thank my family: my parents, Mr.V. Ravindran, R. Shanthi, my father in law, Mr.D.Gurumoorthy, mother in law, G. Dhanalakshmi and my brothers for supporting me spiritually throughout my life. By the same token, my husband, Mr. G. Srinivasandeserve equal accolade. He is my amazing man and has always managed to lift my spirit whenever I was down and I don’t think I would have finished this work without his uninterrupted support. The unwavering encouragement and reassurance that he rendered has been integral in my completion of this degree.

I would like to thank all the people who have directly and indirectly helped me in carrying out the research work and in preparing this thesis.

R.KALAIVANI
