ACKNOWLEDGEMENTS

I am unable to find appropriate words to embody solicitously my true emotions and deep sense of gratitude to my erudite and revered guide Dr. V.K. Mattu, Professor of Zoology, Department of Biosciences, Himachal Pradesh University, Shimla, recipient of "Bharat Excellence Award", "Indian Golden Achiever Award" and "Rising Personality of India", for his outstanding and extraordinary achievements at National and International level; Chapter Delegate-Asian Apicultural Association (AAA), Executive Member-International Union for the Study of Social Insects (I.U.S.S.), for his invaluable and benevolent guidance, keen interest, deep concern and vigilant supervision without which it would not have been possible for me to steer the course of this investigation and present a final shape to this thesis.

It is my privilege to express my sincere thanks to Prof. H.S. Banyal, Chairman, Department of Biosciences, Himachal Pradesh University, Shimla, for providing necessary facilities to carry out the present investigations. I extend my sincere thanks to Prof. (Late) S.S. Katoch, Prof. S.K. Sood and Prof. (Mrs.) Savitri Verma for providing all necessary facilities during their respective tenures as Chairperson of the Department.

Special mention is merited to recognize my heartfelt gratitude to Dr. (Mrs.) Neelam Mattu for her deep affectionate behaviour, valuable guidance and encouragement during the course of present research work.

I am grateful to my friends and lab mates Suneel Sharma, Sangeeta Chandel, Rahul Bhardwaj, Chaman Rao, M.L. Thakur, Sanjay Narang, Vivekananda Sharma, Mahender Singh Thakur, Kisori Lal Sharma, Dheeraj Rawat, Sanjeev Chandel, Meena Sharma, Gagan, Virender Pratap Singh, Ajay Attri, Munish Kumar, Hem Raj, Vishal and Hira Lal whose demonstrative behaviour helped me a lot in completing the present research investigation.

I specially want to thank my colleagues Sh. Ram Singh Atal, Mahender
Guleria, Gulshan Kumar, Kuldeep Sharma and Deep Kumar for their encouragements and guidance.

My sincere thanks are due to laboratory colleagues for their help and cooperation. I am grateful to library staff, H.P. University, Shimla; ZSI Solan; ZSI, Dehradun and FRI, Dehradun. I must acknowledge with deep appreciation the cooperation received from all staff members of Department of Biosciences, H.P. University.

Though many people mentioned and not mentioned, directly or indirectly helped me to complete the work; all errors, omission and inconsistencies that remains are exclusively my own.

Overwhelmingly, I devote this unpretentious effort to my parents (Sh. Mahant Ram Rana and Smt. Shakuntla Rana), brother (Mr. Vijay Rana) and other family members. It was their love, affection, encouragement and inspiration that have enabled me to come up with all worthy achievements. Also I appreciate my beloved wife Mrs. Anuradha Rana for her adorable behaviour, inspiration and encouragements. These lines would be incomplete without citation of inspiration and motivation from my daughter Aditi Suryavanshi who deserves special words.

Financial assistance from Council for Scientific and Industrial Research (CSIR), New Delhi is greatly acknowledged.
