Chapter	PARTICULARS	Page No.
1	INTRODUCTION	1
2	REVIEW OF LITERATURE	5
2.1	Effect of Crop Variety on Growth and Productivity of Ginger	6
2.2	Effect of Biofertilizers on Growth Attributes of Different Crops	7
2.3	Effect of Biofertilizers on Productivity of Different crops	9
2.4	Effect of Biofertilizers and Beneficial Microbes on Spices	11
2.5	Effect of Biofertilizer on Growth and Productivity of Ginger	12
2.6	Effect of Biofertilizer on Nutrient Removal and Soil Fertility Status	14
2.7	Effect of Biofertilizers on Economics of Crop Production	15
2.8	Summary	16
3	MATERIALS AND METHODS	17
3.1	Experimental Site	17
3.2	Experimental Soil	17
3.3	Cropping History	18
3.4	Climatic Condition	18
3.4.1	Temperature	18
3.4.2	Relative humidity (RH)	20

3.4.3	Rainfall	20
3.5	Experimental Details	20
3.5.1	Cultivars used	20
3.5.2	Experimental Design and layout	21
3.6	Cultural Operations	24
3.6.1	Land preparation	24
3.6.2	Manuring	24
3.6.3	Planting	24
3.6.4	Intercultural operation	24
3.6.5	Plant protection	25
3.6.6	Harvesting	25
3.7	Observation Recorded	26
3.7.1	Sprouting of rhizome	26
3.7.2	Plant height (cm)	26
3.7.3	Number of shoots per clump	26
3.7.4	Number of leaves per clump	26
3.7.5	Canopy spread ($\text{cm}^{-2} \text{clump}^{-1}$)	26
3.7.6	Leaf Area Index (LAI)	27
3.7.7	Dry matter accumulation	27
3.7.8	Crop growth rate	27
3.7.9	Rhizome growth	27
3.7.10	Rhizome bulking rate	28
3.7.11	Rhizome yield	28

3.8	Quality parameters	28
3.8.1	Specific Gravity of rhizomes	28
3.8.2	Oleoresin content in rhizome	29
3.8.3	Crude fibre content in rhizome	29
3.9	Nutrient Content	29
3.10	Statistical Analysis	29
3.11	Economic Analysis	30
4	RESULTS	31
4.1	Effect of Variety on Growth and Productivity of Ginger (Experiment no. 1)	31
4.1.1	Effect of variety on growth attributes of ginger	31
4.1.1.1	Sprouting	31
4.1.1.2	Plant height	31
4.1.1.3	Number of shoots per clump	33
4.1.1.4	Number of leaves per clump	34
4.1.1.5	Canopy spread of ginger clump	36
4.1.1.6	Leaf area index	37
4.1.1.7	Dry matter accumulation	38
4.1.1.8	Crop growth rate	39
4.1.2	Effect of variety on yield attributes, yield and quality of ginger	39
4.1.2.1	Rhizome growth	39
4.1.2.2	Rhizome bulking rate in ginger	40
4.1.2.3	Rhizome productivity of ginger	41

4.1.2.4	Crop quality	44
4.2	Effect of biofertilizer on Growth and Productivity of Ginger (Experiment no. 2)	45
4.2.1	Effect of biofertilizer on Growth attributes	45
4.2.1.1	Sprouting	45
4.2.1.2	Plant height	45
4.2.1.3	Number of shoots per clump	50
4.2.1.4	Number of leaves per clump	54
4.2.1.5	Canopy spread of ginger clump	60
4.2.1.6	Leaf area index	63
4.2.1.7	Dry matter accumulation in ginger	67
4.2.1.8	Crop growth rate	70
4.2.2	Effect of biofertilizer on yield attributes, yield and harvest index	74
4.2.2.1	Rhizome growth in ginger	74
4.2.2.2	Effect of biofertilizer on rhizome bulking rate in ginger	77
4.2.2.3	Effect of biofertilizer on productivity and efficiency of ginger	80
4.2.3	Effect of biofertilizer on nutrient content and nutrient removal	84
4.2.3.1	Nutrient content	84
4.2.3.2	Nutrient removal	86
4.2.3.2.1	Nitrogen removal	86
4.2.3.2.2	Phosphorus removal	90

4.2.3.2.3	Potassium removal	94
4.2.4	Effect of biofertilizer on rhizome quality	98
4.2.5	Effect of biofertilizer on available N, P and K status of the experimental soil	101
4.2.6	Effect of biofertilizer on economics of ginger cultivation	103
5	DISCUSSION	109
5.1	Growth Parameters	109
5.2	Yield and Yield Attributes	111
5.3	Nutrient Content, Nutrient Removal and Soil Fertility Status	119
5.4	Rhizome Quality	120
5.5	Economics of Ginger Cultivation	123
6	SUMMARY AND CONCLUSION	124
6.1	Effect of variety	124
6.2	Effect of biofertilizer	125
6.3	Conclusion	130
7	FUTURE LINE OF RESEARCH	131
8	BIBLIOGRAPHY	132
