ACKNOWLEDGMENTS

It gives me immense pleasure to put on record my deep gratitude to Dr. Lovleen Kumar Grover, Associate Professor, Department of Mathematics, Guru Nanak Dev University, Amritsar, my esteemed teacher and supervisor, under whose supervision this work has been carried out. I am indebted to him for his many invaluable and excellent suggestions, sympathetic guidance, encouragement, constructive criticism and untiring help received throughout the course of study.

It is difficult for me to express my gratitude in words to Mrs. Grover for sparing my supervisor Dr. Grover, so that he could concentrate on the research work by making long meetings throughout the day and healthy discussions with me.

I am highly grateful to my grand parents and my in-laws for their continuous encouragement, motivation, and utmost interest during the present work. They have given me an opportunity to learn so much and channeled my enthusiasm to more fruitful avenues.

I also acknowledge the support of my husband Mr. Karanbaljeet Singh, who primarily behaves like a morale booster for me in every respect at the time of depression and act as a regular source of inspiration for me in every moment during the completion of the present work.

I thankful to all my teachers of Mathematics Department who inspired me all the times during this reaserch work. I am also thankful to all my friends, nears and dears who provide me continuously the spirit to do hard work and give me various kinds of assistance throughout the progress of the present work.

Lastly, I wish to pay my sincere thanks to ALMIGHTY GOD for empowering me to complete this worthy work.
